

Crow Cams Holden V8/V6 Camshaft and Memcal Packages

Our memcal packages have been designed to run with stock model 1989 to 1999 Holden Commodores with only limited additions on the stage 2 and 3 kits.

The Stage 1 kit should be completely stock. Stage 2 kit requires 2.5" twin cat exhaust. Stage 3 kit requires minor head work and 2.5" twin cat exhaust. Any other engine /drivetrain mods will require a different solution.

It is very important that the correct information is supplied prior to ordering a kit.

If you are not sure on the history of the vehicle we will be pleased to provide assistance and suggest alternative solutions to your upgrade requirements.

Please fill in the following details prior to ordering a system so we can be sure that the upgrade will be successful.
